

## **UCSD New Laboratory Worker Information**

All lab personnel must complete the attached UCSD New Laboratory Worker Checklist with their Area Safety Coordinator (this is typically the Lab Manager). Your Lab Manager will keep a signed completed copy of this form with their training records, which will be presented to county, city and campus auditors as needed.

In addition to completing the UCSD New Laboratory Worker Checklist, all lab personnel must see the department safety coordinator and complete the following:

- Review Bioengineering Emergency Action Plan
- Add name to the emergency lab roster
- Review proper medical & biohazard waste disposal methods; biohazard shed codes

Attached is a sheet providing information on laboratory training requirements. See the EH&S website for additional information:
